Subject: Comment on Nuclear Waste Confidence Decision

I live within 40 miles of the Duane Arnold Plant where nearly 40 years worth of nuclear waste is stored. America must stop creating more waste by abolishing new nuclear power plants and quickly pulling active plants offline.

Storage in outdoor dry casks or indoor water pools is not safe nor sustainable. A test at the US Army's Aberdeen Proving Ground showed that they are susceptible to terrorist attack. The dry casks can spring leaks and breakdown. The pool storage is a short term solution.

America has not solved its nuclear waste problem. I suggest America first stop making additional waste.
