**Subject:** Nuclear Waste Confidence Decision

To whom it may concern:

Judging by the information presented on the website Freedom From Nuclear Energy, the currently accepted means of long-term storage of nuclear waste in caskets on sites for decades at a time seems highly unconscionable. It apparently has a long history of failure which results in massive fires and the release of deadly chemicals. I would like to add my voice to others crying out for an alternative to this unfortunate method of containment of our nuclear waste.

Sincerely,  
Justin Maddox
