**Subject:** Proposed Nuclear Reactor in Gaffney

To whom it may concern,

This message is in regard to the proposed new nuclear facility in Gaffney, SC (William States Lee). I am a resident of Asheville, NC just sixty miles away and soon to be a Duke ratepayer when Duke assumes their monopoly of our electric grid (already approved by our state utilities commission).

Please do not approve the new facility in Gaffney. At a time when we need to incentivize distributed generation of renewables we should not be investing fortunes in new centralized generation such as this facility.

I am opposed to this plant and all nuclear power. Future generations should not have to bare the burden of our current consumption by babysitting our spent fuel rods. We should take responsibility for such things now by not producing them in the first place.

Please do not move forward with the William States Lee plant in Gaffney, SC.

Thank you,

Dan Clere  
Asheville, NC
