In the Matter of
SHAW AREVA MOX SERVICES
Mixed Oxide Fuel Fabrication Facility
Docket No. 70-3098-MLA

Dear Administrative Judges:

On March 9, 2012, during the MOX Services evidentiary hearing, the Atomic Safety and Licensing Board ("Board") directed the NRC staff to provide citations to several documents referred to in Mr. Tom Pham's testimony concerning the status of a proposed rule to amend 10 C.F.R. Part 74, the NRC's Material Control and Accounting ("MC&A") regulations. As Mr. Pham stated in his testimony, on August 5, 2005, the staff proposed changes to the MC&A program in SECY-05-0143. On November 18, 2005, the Commission issued a Staff Requirements Memorandum ("SRM") for SECY-05-0143 directing the staff to develop a rulemaking plan. On April 25, 2008, the staff submitted SECY-08-0059, which provided a rulemaking plan containing six options. On February 5, 2009, the Commission issued an SRM for SECY-08-0059 approving Option 4, which does not address "Diversion Path Analysis." On December 15, 2011, the proposed rule was submitted to the Commission in SECY-11-0175.

The table on the following page provides the Agencywide Documents Access and Management System ("ADAMS") accession numbers and availability for the documents discussed above. The staff will provide copies of the non-publicly available documents to the parties upon request pursuant to the operative Protective Order.

Respectfully submitted,

/RA/

Marcia J. Simon
Counsel for the NRC Staff
