Dear Mr. Ash:

This is a request under the Freedom of Information Act (FOIA) and the Privacy Act (PA), 5 U.S.C. § 552 and 5 U.S.C. § 552a.

I hereby request that a copy of the following information and or documents be provided pursuant to the Freedom of Information Act.

Any and all documents regarding the composition of underground pipes (water, sewer and storm-sewer) installed during construction of the Grand Gulf Nuclear Power Station near Port Gibson, Mississippi. We believe these installations occurred between 1974 and 1990 and may have been installed by general contractor / engineer Bechtel Corporation. We are not seeking blueprints, plans, construction engineering plans, architectural drawings, etc. related to where piping is located because we understand these documents could contain information that may pose a threat to national security. We are however seeking information whether asbestos cement underground pipes were installed or whether some other type of pipe was installed (steel, cast iron, ductile iron, plastic, etc).

We are more interested in determining the composition of the underground water transmission lines (fresh, waste and storm sewer), than actually obtaining the documents. We do not necessarily need to obtain the documents if someone who can sign an affidavit regarding the composition of the underground transmission lines.

We are simply seeking information related to the composition of the underground water pipes, if any, used during the construction of Grand Gulf Nuclear Power Station. In order to determine my status to assess fees, you should know that my fee category is: affiliated with a private company and seeking records for the company's business associated with pending litigation.

The maximum dollar amount I am willing to pay for this request is \$500. Please notify me if the fees will exceed \$25.00 or the maximum dollar amount I entered.

Thank you for your consideration of this request.

Very truly yours,

HEYL, ROYSTER, VOELKER & ALLEN
