Ok. I just meant that as a reminder since Holly will also have work to do on it once she receives the input from you, and I know work schedules get out of whack this time of year.

Barry,
Thanks. We should be able to meet the Dec 29 date for the draft to reach the Region. If any more changes arise, will discuss with the Region promptly.

George,

I think that should be okay too. But as a note to you and Holly (who will be assuming TIA PM duties starting Dec. 5th), our original agreement per the TIA request was to provide the draft response to the region within 90 days of the inspection that ended 9/30/11. That would give a deadline of December 29th for it to be in the hands of the region. If meeting this date begins to seem impractical over the next couple weeks, it should be discussed with the region as soon as possible to ensure they're aware of the schedule slippage.

Thanks,
Barry

Barry,

As discussed with you, [(b)(6)] and some new developments to Seabrook's approach to address the ASR, I would like to request a change in the due date for "Draft TIA Evaluation to PM" from 12/2/2011 to 12/16/2011 for TAC ME7107, and also the number of hours from 360 to 500. The "Final TIA Evaluation" date will remain the same as before. Please let me know if you are OK with this.
