Subject: TIA - Status RE: Brief Summary of Seabrook ASR Call Today

The latest version of the TIA is at ml 111610530, minor changes since the agreement conference call from Aug. 18. It is through concurrence and Darrell Roberts, after he digests it more, may send it to Nelson who may come to you guys before he signs it. I expect issue next week.

This is just a heads up.

Subject: RE: Brief Summary of Seabrook ASR Call Today

Melanie, Raj reported they your were curious about the next Division Executive Level brief. At the end of the NRR brief two weeks ago, I thought I heard you say that we should NOT go back to "them" unless we have better information on operability and when it will be done.

From the below we initiated action to schedule an inspection to get a better understanding of their status and plans. This is primarily related to operability (last RAI response did not say much on a comprehensive plan). DLR folks are invited but the TIA is focused on the control building and what issues need to be addressed in the final OD by when. I hope the TIA will be signed out early next week (NRR staff agreed with it, and it is at the final stage of concurrence).

Perhaps a debrief with Division Executives would be best a week or two after the inspection for which we are homing in on the Week of 9/26/11.

Information in this record was deleted
in accordance with the Freedom of Information
Act, exemptions 6
FOIA- 2012-0119 *E/1-*

- e. State of ASR depletion
 - f. Schedule of completion
 - g. Final operability determination
5. Walk downs are in progress
6. Crack mapping in progress
7. SGH has preliminary modeling results of Containment Enclosure Bldg they are bench marking against actual conditions
8. Root cause team formally kicked off today
9. Mined the original construction documentation (Suresh Chaudhary will call Ted Vassallo (b)(6))
10. Completed ASR outreach
 - a. Consultation with academic experts
 - b. Scientific literature search

9/12

Note to Rich Conte ... Paul Willoughby appreciates Monday calls.

Discussed logistics of PI&R sample inspection originally proposed week of 9/12.

Note to Abdul and George ... can you delay visit to Seabrook to week of 9/19? Week of 26th would be perfect. Call or email Michael Modes (610.337.5198)
