FW: Conference  
Details (NOV 09...

See below on agenda from a previous email

Tentative list below, if you have add on's let me know.

**Agenda for Internal 11/9/11:**

1. Adequacy of revised PODs to address weaknesses identified during the week of 9/26/11, available on Certrex
2. Adequacy of revised implementation schedule that appears to be the controlling document or view from NextEra on what type sampling and testing they will be doing – Action Plans remains contractor recommendation – What is important that they are not doing that they should be going and regulatory basis.
3. NRC conducted another seminar on ASR Oct 20 – we need to understand what we took away from it – see the below list of issues summarized by Bill Raymond – general question is what standards are we regulating to, do we need a ISG or BTP – fundamental question is do they need to do Triaxial Testing on the sampling.
4. Any answers yet to George Thomas and Bill Raymond question communicated for TIA response – TIA response due 12/30/11
5. Inquiry from C-10 to DLR on ASR issue – what were the discussion points, new actions?
6. Some limited discussion between DRS and DRP on the disposition of the apparent inadequate PODs as of the beginning of the week of 9/26/11.

E/4

7. Suresh is to do a PIR sample the week of 11/28/11 related to the MR scoping apparent cause; that week is also to look at how NextEra is controlling their contractors. He may also need to find out the answers to questions noted herein.
8. Are we ready to Exit on the updated but open URI pending the engineering evaluation of March 2012 – Any violations from the inadequate POD.
9. DRP Input on URI for 50.59 screening issue, the design change was rescinded

Agenda for Conference with NextEra 11/16/11;

1. Exit and matters to discuss
2. Their status of accomplishments since Oct. 1
3. Open issues from 1 to 9 above.

Status on the ASR  
Project at S...
