FOIA/PA REQUEST

Case No.: 2012-0511
Date Rec'd: 4-30-12
Specialist: Burkhalter
Related Case:

To Whom It May Concern,

I am requesting any or all documents that contain the list of all fire protection-related non-compliances and the related compensatory measures for those noncompliances at the San Onofre Nuclear Generating Station. I have attached a letter from the NRC dated March 14, 2011 which specifically references this information. Please see the fourth paragraph of the letter in which the NRC states SONGS must:

- "1. Compile a list of all fire protection-related noncompliances and the related compensatory measures for those noncompliances.
2. Document taht each Operator Manual Action put in place as a compensatory measure is feasible and reliable...."
3. Submit a description of te physical modifications performed.....
4. Submit a status report with milestones of the progress"

The letter goes on to state "the lists of noncompliances, compensatory measures and Operator Manual Action feasibility determinations should be maintained on site for inspector review...."

I am on a tight deadline and respectfully request a swift response to this request. Again, I am requesting the list of fire protecton non compliances, the compensatory measures and the Operator Manual Action feasibility determinations...

Please send any portion of this information as soon as it is available.

Thanks in advance for your time and consideration.

Randy Paige
