**Subject:** Your NRC License Renewal

Mr. Juba:

I tried to call you this morning but got to your voice mail. I have briefly reviewed your renewal application. It looks like you have reproduced most of the application from your last renewal application because it has reference to old regulations. Additionally, you must remember that documents that are submitted to NRC may be made publicly available unless the licensee provides a basis to withhold from public, in affidavit. Your application includes personal information and your credit card information, etc. There is no fee for renewal of a license if the application is sent at least 30 days prior to the expiration date. Therefore, please submit a new application and follow the guidance provided in NUREG 1556, Vol. 4. The application is very easy to complete (most of it consists of check marks). The NUREG can be downloaded from NRC web site at [www.nrc.gov](http://www.nrc.gov).

You need to completed forms provided in Appendix A, and B of the NUREG. Most of the applicants have just printed out these Appendices and submitted after completing the necessary information. In addition to these appendices, we will need a complete list of the gauges (only the model numbers, the manufacturer's name, the isotope and the activity) The list that you included in the application should be sufficient for the application and you can include it with Appendices A and B.

We will shred your current application in our office or return it to you if you wish. If you have any questions, please feel free to call me today at 484 868 0988, or tomorrow at 610 337 5364. Thanks

Sattar Lodhi  
NRC Region I.
