SUBJECT: SUMMARY OF THE MAY 10, 14, 17, AND 21, 2012, PUBLIC MEETINGS ON IMPLEMENTATION OF NEAR-TERM TASK FORCE RECOMMENDATION 2.3, SEISMIC PROTECTION WALKDOWNS, RELATED TO THE FUKUSHIMA DAI-ICHI NUCLEAR POWER PLANT ACCIDENT

On May 10, 14, 17, and 21, 2012, the U.S. Nuclear Regulatory Commission (NRC) staff held public meetings with Nuclear Energy Institute (NEI) representatives and other stakeholders to draft a guidance document that could be used by licensees to perform seismic walkdowns, as discussed in the *Near-Term Task Force (NTTF) Recommendations for Enhancing Reactor Safety in the 21st Century* report, issued July 12, 2011 (The NTTF report is available under Agencywide Documents Access and Management System (ADAMS) Accession No. ML111861807). The list of attendees for each meeting can be found in Enclosures 1 – 4, respectively.

During the course of each meeting, comments and edits from the meeting participants were entered directly into the draft document. The "track changes" feature was enabled to preserve the edits, and the resulting version of the document was made publically available. Below is a table representing each meeting, with the ADAMS Accession No. of the initial draft material for consideration during that meeting in the middle column, and the version of the document resulting from the meetings discussions in the right column.

| Meeting Date | Draft for Consideration                   | Resulting Version |

During each meeting, the public asked questions of the NRC staff or provided comments regarding the content of the guidance document. The NRC staff considered the public comments and edited the final version of the draft guidance document, as appropriate.

At the conclusion of the meeting on May 21, 2012, the NRC staff and industry participants concluded that a final meeting to address comments would be needed prior to NEI requesting NRC endorsement of the guidance document. The NRC and NEI representatives agreed to meet on May 25, 2012, to finalize the draft.
