**Cc:** Regner, Lisa; Kuntz, Robert  
**Subject:** US NRC Meeting - Limerick Generating Station License Renewal Application

Good day Mr. Wagner,

My name is Carmen Fells and I am a Project Manager within the Division of License Renewal at the U.S. Nuclear Regulatory Commission (NRC). We spoke briefly on yesterday about the license renewal application that the NRC received on June 22<sup>nd</sup> from Exelon Generation Company for the Limerick Generating Station. If the license renewal request is approved this nuclear power plant will be allowed to operate 20 years beyond its current license expiration dates of October 2024 (Unit 1) and June 2029 (Unit 2). The three project managers working on the renewal application for the Limerick Generating Station are Lisa Regner, Rob Kuntz, and I. We would like to extend an opportunity for officials within the townships and counties immediately surrounding Limerick to find out more about our license renewal process. NRC representatives plan to visit your area July 6<sup>th</sup> – 8<sup>th</sup>; however, these dates are tentative pending the responses we receive.

Each meeting will include a brief presentation of the NRC's process and a question and answer session. Per our conversation on yesterday your calendar is fairly open for these dates. If you would like to suggest a date and time period please do so, alternatively if you would like to leave these dates open it will help us better coordinate the meeting with other township and county representatives who plan to participate. Please respond to this email and let us know if you and other officials within your municipality would like to attend the meeting. Feel free to email or call.

We look forward to hearing from you.
