SUBJECT: REQUESTS FOR ADDITIONAL INFORMATION FOR THE REVIEW OF THE
SEABROOK STATION, LICENSE RENEWAL APPLICATION – SET 18

Dear Mr. Walsh:

By letter dated May 25, 2010, NextEra Energy Seabrook, LLC, submitted an application pursuant to 10 CFR Part 54, to renew the operating license NPF-86 for Seabrook Station, for review by the U.S. Nuclear Regulatory Commission (NRC or the staff). The staff is reviewing the information contained in the license renewal application and has identified, in the enclosure, areas where additional information is needed to complete the review.

These requests for additional information were discussed with Richard Cliche, and a mutually agreeable date for the response is within 30 days from the date of this letter. If you have any questions, please contact me at (301) 415-3897 or e-mail arthur.cunanan@nrc.gov.

Sincerely,

Arthur Cunanan, Project Manager
Projects Branch 1
Division of License Renewal
Office of Nuclear Reactor Regulation

SEABROOK STATION
LICENSE RENEWAL APPLICATION
REQUESTS FOR ADDITIONAL INFORMATION Set 18

RAI B.2.1.10-3

Background:

In its response to RAI B.2.1.10-1 and B.2.1.10-2 dated January 13, 2011, regarding the Steam Generator (SG) Tube Integrity aging management program (AMP), the applicant provided Commitments 54 to submit a plant-specific AMP for managing the tube-to-tubesheet welds in the case the permanent approval of an alternate reactor coolant pressure boundary (RCPB) cannot be gained. The applicant also provided Commitment 55 to inspect the SG divider plate assembly. The plant-specific AMP for the tube-to-tubesheet welds would entail either a one-time inspection or analytical evaluation to manage aging effects for the welds.

Issue:

Rather than providing specific aspects of the plant-specific AMP (i.e., through the evaluation of the 10 AMP elements), Commitment 54 only provides a synopsis of the AMP. In addition, Commitment 55 is not captured as part of an enhancement or augmentation to the SG Tube Integrity program's updated final safety analysis report (UFSAR) supplement description.

Request:

- (a) Provide details of the plant-specific AMP or appropriate enhancements to other AMPs for management of SG tube-to-tubesheet welds.
- (b) Provide information regarding the one-time inspection of the divider plate assembly in the UFSAR Supplement for the SG Tube Integrity program.

This request is for closure of Open Item OI 3.0.3.2.2-1 in the safety evaluation report with open items.
