Subject: Request for Extension of Comment Deadline

Dear sirs,

The Western Interstate Energy Board requests an additional two weeks (till July 2) in order to properly review and comment on the NRC Draft Report for Comment, "Identification and Prioritization of the Technical Information Needs Affecting Potential Regulation of Extended Storage and Transportation of Spent Nuclear Fuel", dated May 2012.

Though we have tried, we have not managed to be on the proper lists for receipt of NRC reports relevant to our engagement with NRC on Extended Storage/Transportation and Waste Confidence EIS issues. Thus we did not receive this report until July 11, and that by inadvertence. An extra two-weeks will enable us to conduct a proper review.

We appreciate your consideration.

Sincerely, James M. Williams, WIEB, 303-573-8910 x6.
