Senior Vice President, Exelon Generation Company, LLC  
President and Chief Nuclear Officer (CNO), Exelon Nuclear  
4300 Winfield Road  
Warrenville, IL 60555

**SUBJECT: OPERATOR LICENSING EXAMINATION APPROVAL**

Dear Mr. Pacilio:

The purpose of this letter is to confirm the final arrangements for the upcoming operator licensing examinations at the Quad Cities Nuclear Power Station.

The U. S. Nuclear Regulatory Commission (NRC) has completed its review of the operator license applications in connection with this examination and will separately provide a list of approved applicants to Mr. Karl Moser, Training Manager. Note that any examination waivers and application denials have been addressed in separate correspondence.

The NRC has approved the subject examinations and hereby authorizes you to administer the written examinations in accordance with Revision 9 of NUREG-1021, "Operator Licensing Examination Standards for Power Reactors," one day during the week of April 30, 2012. The NRC staff will administer the operating tests during the week of April 23, 2012.

Please contact Mr. Bruce B. Palagi, Chief Examiner, at 630-829-9611, if you have any questions or identify any errors or changes in the license level (RO or SRO) or type of examination (partial or complete written examination and/or operating test) specified for each applicant.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of the NRC's Agencywide Documents Access

**SUBJECT: QUAD CITIES NUCLEAR POWER STATION  
CONFIRMATION OF INITIAL LICENSE EXAMINATION**

Dear Mr. Pacilio:

In a telephone conversation on January 11, 2012, between Mr. E. Pannell, Operations Training and Mr. Bruce Palagi, Chief Examiner, arrangements were made for the administration of licensing examinations at the Quad Cities Nuclear Power Station during the weeks of April 23, 2012 and April 30, 2012. In addition, the NRC will make an examination validation visit to your facility the week of April 2, 2012.

As agreed upon during the telephone conversation, your staff will prepare the examinations based on the guidelines in Revision 9, Supplement 1, of NUREG-1021, "Operator Licensing Examination Standards for Power Reactors." The NRC's regional office will discuss with your staff any changes that might be necessary before the examinations are administered.

To meet the above schedule, it will be necessary for your staff to furnish the examination outlines by February 7, 2012. The written examinations, operating tests, and supporting reference materials identified in Attachment 3 to ES-201 will be due by March 5, 2012. Pursuant to Title 10, Section 55.40(b)(3), of the Code of Federal Regulations (10 CFR 55.40(b)(3)), an authorized representative of the facility licensee shall approve the outlines, examinations, and tests before they are submitted to the NRC for review and approval. All materials shall be complete and ready to use. We request that any personal, proprietary, sensitive unclassified, or safeguards information in your response be contained in a separate enclosure and appropriately marked. Any delay in receiving the required examination and reference materials, or the submittal of inadequate or incomplete materials, may cause the examinations to be rescheduled.

In order to conduct the requested written examinations and operating tests, it will be necessary for your staff to provide adequate space and accommodations in accordance with ES-402, and to make the simulation facility available on the dates noted above. In accordance with ES-302, your staff should retain the original simulator performance data (e.g., system pressures, temperatures, and levels) generated during the dynamic operating tests until the examination results are final.

Appendix E of NUREG-1021 contains a number of NRC policies and guidelines that will be in effect while the written examinations and operating tests are being administered.

To permit timely NRC review and evaluation, your staff should submit preliminary reactor operator and senior reactor operator license applications (Office of Management and Budget (OMB) approval number 3150-0090), medical certifications (OMB approval number 3150-0024), and waiver requests (if any) (OMB approval number 3150-0090) at least 30 days before the first examination date. If the applications are not received at least 30 days before the examination date, a postponement may be necessary. Signed applications certifying that all training has been completed should be submitted at least 14 days before the first examination date.

This letter contains information collections that are subject to the *Paperwork Reduction Act of 1995* (44 U.S.C. 3501 et seq.). These information collections were approved by the Office of Management and Budget, approval number 3150-0018. The public reporting burden for this collection is estimated to average 500 hours per response, including the time for reviewing instructions, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of these information collections, including suggestions for reducing the burden, to the Records and FOIA/Privacy Services Branch (T-5 F52), U. S. Nuclear Regulatory Commission, Washington, DC 20555-0001, or by Internet electronic mail to [INFOCOLLECTS@NRC.GOV](mailto:INFOCOLLECTS@NRC.GOV); and to the Desk Officer, Office of Information and Regulatory Affairs, NEOB-10202, (3150-0018), Office of Management and Budget, Washington, DC 20503.

The NRC may neither conduct nor sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records System (PARS) component of NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

Thank you for your cooperation in this matter. Mr. Pannell has been advised of the policies and guidelines referenced in this letter. If you have any questions regarding the NRC's examination procedures and guidelines, please contact Mr. Bruce Palagi at 630-829-9611, or me at 630-829-9707.

Sincerely,

/RA/

KKM-11-001

March 10, 2011

Mr. Hironori Peterson  
U.S. NRC Region III  
2443 Warrenville Road, Suite 210  
Lisle, IL 60532-4352

Dear Mr. Peterson:

Quad Cities Generating Station requests a date change for the CY2012 Initial Operator License Examination. The current Nuclear Regulatory Commission schedule shows a start date of March 26, 2012 and end date of April 6, 2012. Quad Cities Station requests a start date of April 23, 2012 and end date of May 4, 2012. The requested change in dates is to add one month of exam development time. This is due to a month long simulator outage required to replace critical hardware components. Additionally, conversations with the Region III scheduler indicate the requested time period is available.

If additional information is required, please contact me at (309) 227-4000 or Frank Schulte at (309) 227-4137.

Sincerely yours,

Karl K. Moser  
Training Director  
Quad Cities Nuclear Station

**SUBJECT: CONFIRMATION OF INITIAL OPERATOR LICENSE EXAMINATIONS:  
QUAD CITIES NUCLEAR POWER STATION**

Dear Mr. Pacilio:

We have received your corporate letter RS-10-130. In that letter, you requested an initial operator licensing examination be scheduled at the Quad Cities Nuclear Power Station for September 2013 and February 2015.

In response, we have scheduled an initial operator licensing examination for the weeks of October 14 and 21, 2013, at the Quad Cities Nuclear Power Station. Additionally, we have scheduled an initial operator licensing exam for the week of March 23, 2015. On-site validation of these examinations is tentatively scheduled approximately three weeks prior to the examination dates. We note that you were previously scheduled for an initial operator licensing exam the week of March 26, 2012. Per your request, we have rescheduled this exam for the weeks of April 23 and April 30, 2012. We have scheduled an onsite validation date of April 2, 2012. In the unlikely event that we are unable to support the examination during the scheduled weeks, we will inform you immediately upon discovery of such conditions and make arrangements to administer the examination at a mutually acceptable date.

We understand that your staff will develop the examinations unless we determine it is necessary for the NRC to develop an examination in which case, we will notify you immediately upon discovery of that need. Because your letter indicated that there were more than nine applicants being considered for each of these examinations, the examinations were each scheduled for two weeks. Please inform us if the number of candidates change for any examination as this will impact the examination schedule. Also, please inform us at your earliest opportunity if you discover you need to change the scheduled dates for the examinations.

A supplementary letter will be sent to the training department approximately 120 days prior to the examination informing the training manager of the chief examiner's name. The letter will also outline examination security expectations, list the materials required by the NRC to conduct the examination, reconfirm the examination date, and reconfirm the number of candidates you have in the training program.

M. Pacilio

Subject: Exelon Generation Company, LLC (EGC) Response to NRC Regulatory Issue  
Summary 2010-08, "Preparation and Scheduling of Operator Licensing Examinations"

Reference: NRC Regulatory Issue Summary 2010-08, "Preparation and Scheduling of Operator  
Licensing Examinations," dated June 28, 2010

The referenced Regulatory Issue Summary (RIS) requested that facility licensees provide a proposed schedule of operator licensing examinations and an estimate of the number of candidates requiring initial operator license examinations for calendar years 2012 through 2015, and the number of candidates requiring Generic Fundamentals Examinations for calendar years 2012 and 2013. Attachments 1 through 10 provide responses to RIS 2010-08 for the EGC plants identified above. The requested information for each facility is provided on a separate NRC Form 536.

There are no regulatory commitments contained within this letter. Should you have any questions about this letter, please contact Mitchel Mathews at (630) 657-2819.

Respectfully,

Jeffrey L. Hansen  
Manager - Licensing and Regulatory Affairs

**UNITED STATES  
NUCLEAR REGULATORY COMMISSION**

REGION III  
2443 WARRENVILLE ROAD, SUITE 210  
LISLE, IL 60532-4352

February 19, 2010

Mr. Charles G. Pardee  
Senior Vice President, Exelon Generation Company, LLC  
President and Chief Nuclear Officer (CNO), Exelon Nuclear  
4300 Winfield Road  
Warrenville IL 60555

**SUBJECT: CONFIRMATION OF REQUESTED INITIAL OPERATOR LICENSE  
EXAMINATIONS: NRC REGION III EXELON STATIONS**

Dear Mr. Pardee:

In a letter dated August 13, 2009 (RS-09-109), your staff responded to Regulatory Issue Summary (RIS) 2009-11, and requested we schedule initial license operator examinations for the Exelon Nuclear Plants. In a separate letter dated March 19, 2009 (U-603882), Clinton Power Station requested an examination be administered in October or November 2010 that was not included in your RIS response letter. That examination has been added to your examination schedule. In a separate letter dated November 18, 2009 (U-603924), Clinton Power Station requested we not schedule the examination requested in December 2011 per your letter, but retain an August 2011 examination scheduled from your response to the 2008 RIS for examination scheduling. In a separate letter dated January 6, 2010 (Byron 2010-0003), Byron Station requested we change the dates of their examinations proposed for 2011, 2012, and 2013 to other dates. We were unable to accommodate the April 2013 examination requested for Quad Cities Nuclear Power Station. It is currently listed as "To Be Determined" as we are currently negotiating a mutually acceptable examination date with Quad Cities training department personnel. This letter confirms scheduling of the requested examinations at the Region III Exelon power plants and incorporates the changes requested by Clinton Power Station and Byron Station. We have tentatively scheduled the requested examinations to occur as follows:

Station	2010	2011	2012	2013	2014
Braidwood	N/R	06/20	N/R	03/25	N/R
Byron	9/27	N/R	01/16	01/14	01/27
Clinton	11/1	8/22	N/R	8/19	N/R
Dresden	03/08	03/07	3/05	3/04	N/R
LaSalle	09/13	N/R	09/24	N/R	N/R
Quad Cities	N/R	5/30	3/26	TBD	N/R

N/R - None Requested    TBD - To Be Determined

On-site validation of the examinations is tentatively scheduled to occur approximately three weeks before each scheduled examination. In the unlikely event that we are unable to support the examination during the scheduled weeks, we will inform you and the affected station's training department immediately upon discovery of such conditions and make arrangements to administer the examination at a mutually acceptable date.

We understand that your staff will develop the proposed examinations unless we discover it is necessary for the NRC to develop an examination. If an examination anticipates greater than nine anticipated applicants for the examination, the examination is scheduled for two weeks. Otherwise, the examination is scheduled for one week. Please inform us if the number of candidates declines below ten for any examination as this will impact the examination schedule. Please inform us at your earliest opportunity if you discover a need to change any of the dates of the scheduled examinations.

A supplementary letter will be sent to each station's training department director approximately 120 days prior to the initial examination. The letter will provide the director with the chief examiner's name, an outline of examination security expectations, a list of the materials required by the NRC to conduct the examination, and it will reconfirm the examination dates and the number of candidates you have in the training program. If you have any questions concerning this information, please contact Mr. Dell McNeil of my staff at 630-829-9737.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records System (PARS) component of NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

Sincerely,

/RA/

Hironori Peterson, Chief  
Operations Branch  
Division of Reactor Safety

Subject: Response to NRC Regulatory Issue Summary 2009-11, "Preparation and Scheduling of Operator Licensing Examinations"

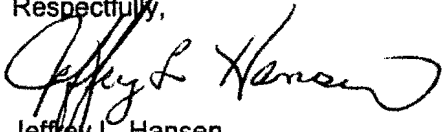

Reference: NRC Regulatory Issue Summary 2009-11, "Preparation and Scheduling of Operator Licensing Examinations," dated July 16, 2009

The referenced Regulatory Issue Summary (RIS) requested that facility licensees provide a proposed schedule of operator licensing examinations and an estimate of the number of candidates requiring initial operator license examinations for calendar years 2010 through 2013, and the number of candidates requiring Generic Fundamentals Examinations (GFEs) for calendar years 2010 and 2011. Attachments 1 through 10 provide responses to RIS 2009-11 for the Exelon Generation Company, LLC (EGC) plants identified above. The requested information for each facility is provided on a separate NRC Form 536.

In calendar year 2010, eight candidates are expected to take the dual-site Limited Senior Reactor Operator (LSRO) initial license examination as indicated on Attachment 6. The schedule for the indicated examination is as follows: the written examination and a portion of the operating examination will be given at Limerick Generating Station (LGS); the remainder of the operating examination will be completed at Peach Bottom Atomic Power Station (PBAPS). Since the LSRO examination is a dual-site examination that involves both LGS and PBAPS, rather than repeating the same information on both attachments, the examination scheduling information is provided on Attachment 6 for LGS. Attachment 8 for PBAPS references Attachment 6 where appropriate.

There are no regulatory commitments contained within this letter. Should you have any questions about this letter, please contact Mitchel Mathews at (630) 657-2819.

Respectfully,

Jeffrey L. Hansen  
Manager - Licensing and Regulatory Affairs

Attachment 1 - Completed NRC Form 536 for Braidwood Station  
Attachment 2 - Completed NRC Form 536 for Byron Station  
Attachment 3 - Completed NRC Form 536 for Clinton Power Station  
Attachment 4 - Completed NRC Form 536 for Dresden Nuclear Power Station  
Attachment 5 - Completed NRC Form 536 for LaSalle County Station  
Attachment 6 - Completed NRC Form 536 for Limerick Generating Station  
Attachment 7 - Completed NRC Form 536 for Oyster Creek Nuclear Generating Station  
Attachment 8 - Completed NRC Form 536 for Peach Bottom Atomic Power Station  
Attachment 9 - Completed NRC Form 536 for Quad Cities Nuclear Power Station  
Attachment 10 - Completed NRC Form 536 for Three Mile Island Nuclear Station - Unit 1

<b>NRC FORM 536</b> (10-2008)	<b>U.S. NUCLEAR REGULATORY COMMISSION</b>	APPROVED BY OMB: NO. 3150-0131 EXPIRES: 10/31/2011 Estimated burden per response to comply with this voluntary information collection request: 1 hour. This information collection is used to plan budgets and resources for operator examinations. Send comments regarding burden estimate to the Records and FOIA/Privacy Services Branch (T-5 F53), U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, or by internet e-mail to <a href="mailto:infocollections@nrc.gov">infocollections@nrc.gov</a> , and to the Desk Officer, Office of Information and Regulatory Affairs, NE08-10202, (3150-0131), Office of Management and Budget, Washington, DC 20503. If a means used to impose an information collection does not display a currently valid OMB control number, the NRC may not conduct or sponsor, and a person is not required to respond to, the information collection.

Mr. Charles G. Pardee  
Chief Nuclear Officer and  
Senior Vice President  
Exelon Generation Company, LLC  
4300 Winfield Road  
Warrenville IL 60555

SUBJECT: CONFIRMATION OF REQUESTED INITIAL OPERATOR LICENSE  
EXAMINATIONS: NRC REGION III EXELON STATIONS

Dear Mr. Pardee:

In a letter dated July 22, 2008, (RS-08-092) your staff responded to Regulatory Issue Summary 2008-16 and requested we schedule initial license operator examinations for the Exelon Nuclear Plants. In a separate letter dated July 11, 2008, (KKM-08-001) the Quad Cities Nuclear Power Station Training Manager requested a change to the start date of the Station's 2009 examination. This letter confirms scheduling of the requested examinations at the Region III power plants and the change requested for the Quad Cities Nuclear Power Station 2009 examination. We have tentatively scheduled the requested examinations to occur as follows:

Station	2009	2010	2011	2012
Braidwood	10/05	N/R	6/20	N/R
Byron	N/R	9/27	9/12	9/10
Clinton	8/24	N/R	8/22	N/R
Dresden	03/09	03/08	3/07	3/05
LaSalle	N/R	09/13	N/R	9/17
Quad Cities	11/30	N/R	5/30	3/26

N/R - None Requested

On-site validation of the examinations is tentatively scheduled to occur approximately three weeks before each scheduled examination. In the unlikely event that we are unable to support the examination during the scheduled weeks, we will inform you and the affected station's training department immediately upon discovery of such conditions and make arrangements to administer the examination at a mutually acceptable date.

We understand that your staff will develop the proposed examinations unless we discover it is necessary for the NRC to develop an examination. Because the examinations have greater than nine anticipated applicants, each examination is scheduled for two weeks. Please inform us if the number of candidates declines below ten for any examination as this will impact the examination schedule. Please inform us at your earliest opportunity if you discover a need to change any of the dates of the scheduled examinations.

A supplementary letter will be sent to each station's training department director approximately 120 days prior to the initial examination. The letter will provide the director with the chief examiner's name, an outline of examination security expectations, a list of the materials required by the NRC to conduct the examination, and it will reconfirm the examination dates and the number of candidates you have in the training program. If you have any questions concerning this information, please contact Mr. Dell McNeil of my staff at 630-829-9737.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's Agencywide Documents Access and Management System (ADAMS). ADAMS is accessible from the Electronic Reading Room page of the NRC's public Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

/RA/

Subject: Response to NRC Regulatory Issue Summary 2008-16, "Preparation and Scheduling of Operator Licensing Examinations"

Reference: NRC Regulatory Issue Summary 2008-16, "Preparation and Scheduling of Operator Licensing Examinations," dated June 27, 2008

The referenced Regulatory Issue Summary requested that facility licensees provide a proposed schedule of operator licensing examinations and an estimate of the number of candidates requiring initial operator license examinations for calendar years 2009 through 2012, and the number of candidates requiring Generic Fundamentals Examinations for calendar years 2009 and 2010. Attachments 1 through 10 provide responses for the Exelon Generation Company, LLC and AmerGen Energy Company, LLC plants identified above. The requested information for each facility is provided on a separate NRC Form 536.

In calendar year 2009, six candidates are expected to take the dual-site Limited Senior Reactor Operator (LSRO) initial license examination as indicated on Attachment 8. The schedule for the indicated examination is as follows: the written examination and a portion of the operating examination will be given at Limerick Generating Station (LGS); the remainder of the operating examination will be completed at Peach Bottom Atomic Power Station (PBAPS). Since the LSRO examination is a dual-site examination that involves both LGS and PBAPS, rather than repeating the same information on both attachments, the examination scheduling information is provided on Attachment 8 for PBAPS. Attachment 6 for LGS references Attachment 8 where appropriate.

There are no regulatory commitments contained within this letter. Should you have any questions about this letter, please contact Mitchel Mathews at (630) 657-2819.

Respectfully,

Darin M. Benyak  
Director - Licensing and Regulatory Affairs
