Just to clarify, that would be dropping off CDs to US EPA Headquarters in Washington DC.

We have detected problems with CDs sent out last week and will be assessing the situation and providing updates as soon as possible.

Hard copies of the Fermi DEIS are being mailed out starting today.

Thanks.....

Elizabeth,

I just came back from dropping off 3 good CDs to Pearl Young at your office.

Regards,
John

Regarding item 2), our working draft summary of that site visit in August captures the EPA participation (I think you and Melanie Haveman) in the discussions. We plan to finalize and issue a trip report on that site visit in the near future.

Regarding item 1), we will check on the CD's. I had spot checked a few but there may be a bad batch of them or just a single blank that you received. We will be sending hard copies and CD's out tomorrow and you will receive new material.

Our apologies, and thanks for the heads up on the bad CD. The Fermi DEIS will be up on the NRC web site by the end of this week.

Thanks.....

Hey Bruce -

Two follow-up items from today -

1) Region 5 received the the cover letter and CD sent our HQ for the Federal Register today - however, the CD was blank. I can access the documents from ADAMS, but I thought you should have a heads up that other CDs may also be blank. Region 5 requested four copies of each CD and paper versions, so we will wait for those to arrive.

2) The 2nd bullet point under Joint Permit Application from the September 26th meeting minutes does not list EPA as a participant for the August 8-9, 2011 site visit. I'm sure EPA will be listed as participating in the forthcoming meeting report, however we wanted to make you aware of this omission.

Thanks, Elizabeth
