SUBJECT: VOID LETTER CONCERNING APPLICATION FOR A LICENSE AMENDMENT,  
CONTROL NUMBER 577283

The Nuclear Regulatory Commission (NRC) has received your request to amend NRC license number 53-29296-01 to name Lyle Wong, Ph.D., as radiation safety officer (RSO) and irradiator operator as described in letter dated April 4, 2012, and electronic communications dated May 31, 2012, and June 6, 2012. The training and experience documentation submitted to the NRC was found adequate; however, it is incomplete. Therefore, your request to amend license number 53-29296-01 is being voided without prejudice. You can resubmit your amendment request by providing only the information listed below, and the NRC will reinstate the request to amend this license to name Lyle Wong as RSO and irradiator operator.

Radiation Safety Officer:

1. Provide documentation of 3 months (full-time equivalent) of experience at the licensee's irradiator or at another irradiator facility of a similar type. The 3 months of experience may include preoperational involvement, such as acceptance testing, while the irradiator is being constructed.

Irradiator Operator:

1. Provide documentation of 1 month (full-time equivalent) of on-the-job or simulator training supervised by an experienced operator. The supervised on-the-job or simulator training must include:
  - A. Performing operating procedures which the individual is responsible for performing,
  - B. Test runs of emergency procedures which the individual is responsible for performing,
  - C. Routine maintenance, and
  - D. Lock-out procedures.

2. Before an individual is permitted to operate an irradiator without a supervisor present, the individual shall pass a written test on the instruction received consisting primarily of questions based on the licensee's operating and emergency procedures that the individual is responsible for performing and other operations necessary to safely operate the irradiator without supervision. Provide documentation of successful completion of such written test.

Individual who provides assistance:

1. Provide information on the individual, other than the RSO and irradiator operator, who will be on site during operations and will receive instruction on how to respond to the independent backup access control alarm and to promptly render or summon assistance. State the type of instruction that the individual will receive to perform this duty, and date of instruction received.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Thank you for your cooperation.

Sincerely,

**/RA/**
