Subject: New License No. 47-31475-01, Docket No. 030-38551
Date: Thursday, June 21, 2012 1:00:00 PM

Mr. Allison,

This email is in response to the above subject application for a new NRC radioactive materials license. In order to continue our review, we need the following additional information submitted to our office:

- 1: Your application needs to be reviewed and signed by a member of management. Therefore, please provide an organization chart depicting that you are a member of management. If you are not considered a member of management, please have a representative from management review this and all subsequent submissions to this office regarding your NRC license.
- 2: Your application does not address the maximum amount of radioactive material you wish to possess. Please submit the maximum amount of radioactive material you seek authorization to possess.
- 3: Your application does not adequately address how you will perform routine maintenance. The please confirm that you will implement and maintain procedures for routine maintenance of your fixed gauges in accordance with each manufacturer's or distributor's written recommendations and instructions.

We will continue our review upon receipt of this additional information. Please note that you may fax us the information at 610-337-5269. Please ensure to reference your license and docket numbers when submitting any correspondence. Thank you for your attention to this matter.

In addition, we will need to perform a pre-licensing visit before the license can be issued. Please let us know what a good time frame would be for such a visit from now until the end of July.

Thank you.

Shawn
