Subject: CY Comments on NRC's Advance Notice of Proposed Rulemaking (ANPR) – Onsite Emergency Response Capabilities: 10 CFR Parts 50 and 52

References:

- (a) Advance Notice of Proposed Rulemaking (ANPR) – Onsite Emergency Response Capabilities: 10 CFR Parts 50 and 52 (Docket ID NRC-2012-0031)
- (b) License No. DPR-61 (Docket No 50-213, 72-39) (Connecticut Yankee)
- (c) Decommissioning Plant Coalition letter to the US NRC Regarding NRC's Advance Notice of Proposed Rulemaking (ANPR) – Onsite Emergency Response Capabilities (June 18, 2012)

Connecticut Yankee Atomic Power Company (CY) appreciates the opportunity submit comments regarding the NRC's Advance Notice of Proposed Rulemaking: "Onsite Emergency Response Capabilities" (Reference (a)) whereby the NRC is proposing to amend its regulations to strengthen and integrate onsite emergency response capabilities.

CY supports the position provided in the Decommissioning Plant Coalition (DPC) comment letter (reference (c)) that this ANPR and subsequent rulemaking is not applicable to 10 CFR Part 50 Licensees that only operate an Independent Spent Fuel Storage Installation (ISFSI) at the former reactor site. Since the CY ISFSI facility does not have an operating reactor and the power plant has been completely decommissioned, this proposed rulemaking would not apply this 10 CFR Part 50 licensee and the associated facility.

Accordingly, CY urges the Commission to include a specific statement in the future development of this rulemaking that clearly delineates that this rulemaking does not apply to holders of an operating license under 10 CFR Part 50 that have permanently ceased operation, certified that fuel has been permanently removed from the reactor vessel under 10 CFR Part 50.82, and have completed decommissioning of the power plant and only operate an ISFSI.

Sincerely,

A handwritten signature in black ink, appearing to read "Jim Lenois".
Jim Lenois
CY ISFSI Manager
