Dear Dr. Armijo:

During the 595th meeting of the Advisory Committee on Reactor Safeguards (ACRS or the Committee) which occurred June 6-8, 2012, ACRS reviewed Proposed Revision 1 to Regulatory Guide 1.192 (DG-1232), "Operation and Maintenance Code Case Acceptability, ASME OM Code."

By letter dated June 18, 2012 (Agencywide Documents Access and Management System Accession No. ML12163A222), the Committee provided a recommendation to (1) revise the conditions for acceptability of Code Case OMN-3 to include reference to Regulatory Guide 1.200, "An Approach for Determining the Technical Adequacy of Probabilistic Risk Assessment Results for Risk-Informed Activities," and (2) to add a condition that the risk categorization be reviewed when the probabilistic risk assessment is updated by the user of Code Case OMN-3. The NRC staff agrees with both parts of your recommendation and has revised the regulatory guide accordingly.
