Subject: Comments on PRM-50-104, Docket ID NRC-2012-0046

July 17, 2012 (1:35 pm)

OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF

Aging concrete and human error are too dangerous. I want Diablo decommissioned.

Mikel Gorbachev wrote that Chernobyl caused the decline of the USSR.

What if the wind blows across California during a Diablo-Fukushima event? California will become two states, or a divided one. I will lose my livelihood. My daughter and my siblings will lose their inheritances in San Luis Obispo real estate...the only thing that keeps me from poverty.

Kentucky has better roads than hwy 101 which is two lanes in both directions and full, often, already. My parents tell me to stay put in my home....No one is going to safely get out.

It is for all these reasons that I request that the NRC adopt the proposed rule expanding emergency planning zones to the respective 25, 50, and 100 mile zones and add a new requirement that emergency exercises include scenarios of regionally appropriate initiating or concurrent natural disasters.

Thank you,

nancy watts
