July 17, 2012 (1:35 pm)

OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF

Estremed people,
I will not convey here facts and figures. I appeal to a simpler kind of reasoning. Fuishima is still a disaster. Judging by the error prone nature of complex technology coupled with the difficulty of maintence staff staying vigilant for thousands of days, serious nuclear accidents will happen in our country. When that occurs we need to be ready. Extend the emergency zones. Err on the side of caution.

Thank you,

Kevin Lay
