Chairperson Gregory B. Jaczko
U.S. Nuclear Regulatory Commission
Mail Stop 016-D3
Washington, D.C. 20555-0001

Dear Mr. Jaczko,

I'm concerned about safety at U.S. nuclear plants that generate electricity and material for bombs.

What protects us from nuclear disaster?

- meticulously detailed, careful, annual inspections of every system of a nuclear plant;
- your and other commissioners' refusal to be friends with plant owners and operators;
- whistleblowers;
- your listening to seismologists.

What does not protect us from nuclear disaster?

- a wonderful website;
- expensive clothes and silver tongues;
- overly-vibrated, patched-up, decrepit, corroded and carelessly inspected plants, especially if over 40 years old.

Considering your billion-dollar budget and my thin wallet, I request safety first, please.

Thank you for your attention to this matter.

Sincerely,

MCSwearingen
