Furniture, Ergonomic Equipment, and Furniture Support Services

On July 16, 2012, as a result of a noncompetitive Federal Supply Schedule solicitation, a Blanket Purchase Agreement (No. NRC-HQ-12-A-10-0014) was awarded to Price Modern, LLC. of Baltimore, MD. The contractor will provide systems furniture, ergonomic equipment and furniture support services for NRC headquarters locations. The period of performance is July 22, 2012, to July 21, 2013, with four 1-year option periods. The total estimated cost is \$4,301,985.45, inclusive of all options.

ENCLOSURE C

Office of Nuclear Reactor Regulation (NRR)
Items of Interest
Week Ending July 20, 2012

Indian Point License Amendments Issued

On July 12, 2012, staff issued license amendments approving a newly-designed spent fuel transfer system at Indian Point. Starting in August, spent fuel assemblies will be transferred via a shielded transfer canister in a borated water environment from the Unit 3 to the Unit 2 spent fuel pool (SFP) prior to ultimate storage at the common Indian Point independent spent fuel storage installation (ISFSI). With the Unit 3 SFP virtually full, the licensee is currently unable to perform either a full core offload or the next refueling outage scheduled for March 2013.

Grand Gulf Nuclear Station, Unit No. 1, Extended Power Uprate (EPU)

On July 18, 2012, staff approved an increase in the maximum steady-state power level at Grand Gulf Nuclear Station, Unit No. 1 from 3,898 megawatts thermal (MWt) to 4,408 MWt, which is approximately a 13-percent increase in thermal power over the previous licensed thermal power and a 15-percent total increase over the original licensed thermal power (3,833 MWt). The staff determined that the licensee could safely increase the reactor's output primarily by changing the core design and upgrading certain balance-of-plant components, such as replacing the steam dryer, high-pressure turbine, and reactor feed pump turbine rotor. The power uprate will increase the unit's generating capacity by approximately 200 megawatts electric. The licensee plans to implement the EPU over the next few months.

Office of Public Affairs (OPA)
Items of Interest
Week Ending July 20, 2012

OPA received significant media inquiries on the following:

The extreme hot temperatures and the impact on nuclear plants on the Eastern Seaboard; including, the power reduction at the Vermont Yankee nuclear plant (VT) due to high river temperature and low flow.

The Augmented Inspection Team's preliminary findings at the San Onofre nuclear plant (CA).

The Indian Point nuclear plant (NY) recent supplement to the license renewal application's environmental impact statement.

The recent manual shut down of the Limerick nuclear plant (PA) due to a transformer electrical fault.

The National Academies of Science Fukushima study.

The recent problems at the Oyster Creek nuclear plant's (NJ) emergency sirens.

Other Public Affairs Items:

OPA supported the following activities:

- Participated in a taped interview with WSJM news radio on the independent safety culture assessment at the Palisades nuclear plant (MI).
- Live interview at the Rockford television station to discuss the Byron nuclear plant's (IL) annual assessment meeting.
- The Fort Calhoun nuclear plant's (NE) 0350 public meeting and including local reporter questions on the status of NRC's actions and increased oversight at the plant.

OPA issued blog posts:

- NRC Office of Nuclear Security and Incident Response celebrates 10 years.
- What happens when you submit a Freedom of Information Act Request to the NRC?
