Approval of Dr. Sostre as Radiation Safety Officer

I had requested that the licensee provide a NRC Form 313A (RSO) for Samuel Sostre, M.D. so that I could approve him as Radiation Safety Officer. The licensee's response indicated they did not think it was necessary because of his years of experience in Nuclear Medicine. I did another ADAMS search for Dr. Sostre and found that Dr. Sostre was listed as RSO on the San Juan City Hospital license (NRC License Number 52-06121-02, Docket Number 030-03517), which was authorized for 35.100, 35.200, and Iodine-131 permitted under 35.300. Dr. Sostre served as RSO on the license from 1997 to the time of its termination on January 26, 2006. Because Dr. Sostre has served as RSO on a NRC license during the last seven years, I can approve him as RSO without any additional information.
