SUBJECT: PRAIRIE ISLAND NUCLEAR GENERATING PLANT, UNIT 1 – CORRECTION TO
LICENSE PAGE INCLUDED WITH AMENDMENT NO. 203 REGARDING
PHYSICAL SECURITY PLAN CHANGE (TAC NO. ME5897)

Dear Mr. Molden:

By letter dated August 16, 2011 (Agencywide Documents Access and Management System (ADAMS) Accession No. ML111990469), the U.S. Nuclear Regulatory Commission (NRC) issued Amendment No. 203 to Renewed Facility Operating License No. DPR-42 for the Prairie Island Nuclear Generating Plant (PINGP), Unit 1.

Following issuance of Amendment No. 203, the NRC staff determined that two typographical errors had been inadvertently introduced into paragraph 2.C.(3) of the affected license page (License Page 4). The last portion of paragraph 2.C.(3) was issued as follows (emphasis added):

NSPM shall fully implement and maintain **an** effect all provisions of the Commission-approved Northern States Power Company – Minnesota (NSPM) Cyber Security Plan (CSP), including changes made pursuant to the authority of 10 CFR 50.90 and 10 CFR 50.54(p). The NSPM CSP was approved by **Licensee** Amendment No. 202.

Amendment No. 202 was the previous amendment affecting License Page 4. This amendment was issued on July 29, 2011 (ADAMS Accession No. ML11187A231), and concerned the approval of the facility cyber security plan. The affected paragraph of License Page 4 did not include the above typographical errors. The affected paragraph in License Page 4 was issued as follows (emphasis added):

NSPM shall fully implement and maintain **in** effect all provisions of the Commission-approved Northern States Power Company – Minnesota (NSPM) Cyber Security Plan (CSP), including changes made pursuant to the authority of 10 CFR 50.90 and 10 CFR 50.54(p). The NSPM CSP was approved by **License** Amendment No. 202.

The NRC staff concludes that these typographical errors were inadvertently introduced in the license amendment request, that the errors are entirely editorial in nature, and that the erroneous changes were not the subject of the amendment or the associated notice to the public. Accordingly, these errors may be corrected by a letter in accordance with the NRC's policy established by SECY-96-238 (ADAMS Accession No. ML003754054).

Please find enclosed the replacement License Page 4 for Amendment No. 203. This correction does not change any of the NRC staff's conclusions in the safety evaluation associated with the amendment.

If you have any questions regarding this matter, please call me at (301) 415-4037.

Sincerely,
