Dear Mr. Copp:

On June 20, 2012, the U.S. Nuclear Regulatory Commission (NRC) completed an initial security inspection of the physical security program for the Westinghouse Hematite facility located near Festus, Missouri. At the conclusion of the on-site inspection on June 20, 2012, the inspectors discussed the inspection findings with you, and members of your project management, licensing, radiation safety and security staff.

The inspection also examined activities conducted under your license as they relate to security and compliance with the NRC's rules and regulations and with the conditions of your license. The inspectors reviewed selected procedures and records, observed activities, and interviewed personnel. The enclosed inspection report documents the inspection results.

No findings were identified during this inspection.
