

## SAFETY INSPECTION REPORT AND COMPLIANCE INSPECTION

## 1. LICENSEE/LOCATION INSPECTED:

V. Goburdhun, M.D. P.C.  
14555 Levan Road  
Suite 403  
Livonia, MI 48154

REPORT NUMBER(S) 12-01

## 2. NRC/REGIONAL OFFICE

Region III  
U. S. Nuclear Regulatory Commission  
2443 Warrenville Road, Suite 210  
Lisle, IL 60532-4352

## 3. DOCKET NUMBER(S)

030-36054

## 4. LICENSE NUMBER(S)

21-32408-01

## 5. DATE(S) OF INSPECTION

07/27/2012

## LICENSEE:

The inspection was an examination of the activities conducted under your license as they relate to radiation safety and to compliance with the Nuclear Regulatory Commission (NRC) rules and regulations and the conditions of your license. The inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector. The inspection findings are as follows:

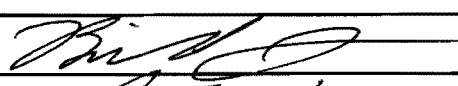

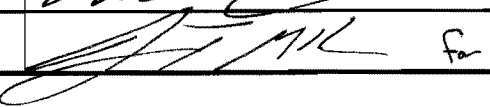

- ☒ 1. Based on the inspection findings, no violations were identified.
- ☐ 2. Previous violation(s) closed.
- ☐ 3. The violation(s), specifically described to you by the inspector as non-cited violations, are not being cited because they were self-identified, non-repetitive, and corrective action was or is being taken, and the remaining criteria in the NRC Enforcement Policy, to exercise discretion, were satisfied.

Non-cited violation(s) were discussed involving the following requirement(s):

- ☐ 4. During this inspection, certain of your activities, as described below and/or attached, were in violation of NRC requirements and are being cited in accordance with NRC Enforcement Policy. This form is a NOTICE OF VIOLATION, which may be subject to posting in accordance with 10 CFR 19.11.  
(Violations and Corrective Actions)

## Statement of Corrective Actions

I hereby state that, within 30 days, the actions described by me to the Inspector will be taken to correct the violations identified. This statement of corrective actions is made in accordance with the requirements of 10 CFR 2.201 (corrective steps already taken, corrective steps which will be taken, date when full compliance will be achieved). I understand that no further written response to NRC will be required, unless specifically requested.

☒ Main Office Inspection

Next Inspection Date: 07/2017

☐ Field Office Inspection

☐ Temporary Job Site Inspection

**PROGRAM SCOPE**

This was a routine inspection of a cardiology clinic located in Livonia, Michigan. The licensee is authorized to use licensed material permitted by Title 10 Code of Federal Regulations 35.200. The licensee is staffed with one nuclear medicine technologist. The cardiology clinic performs cardiology procedures using Tc99m from the local nuclear pharmacy in the form of unit doses. The licensee obtained an outside consultant to perform program audits, instrument calibrations, and radiation safety training. The licensee is operational on Friday only. Currently, the licensee is going through ACR Accreditation and therefore, is not actively performing patient procedures. The last time patient procedures were performed was on June 1, 2012.

**Performance Observations**

At the time of the inspection, the technologist was unavailable due to a family emergency. The inspector reviewed selected records, toured the nuclear medicine department, and performed independent measurements. The inspector was able interview the technologist on August 6, 2012. Interviews conducted with the technologist revealed an adequate level of understanding of emergency and material handling procedures and techniques.

No violations of NRC requirements was identified.
