EVENTS

On July 26, 2012, the U.S. Nuclear Regulatory Commission (NRC) held a Category 2 public meeting with the Nuclear Energy Institute (NEI), industry representatives, and members of the public in order to discuss the development of the Interim Staff Guidance (ISG), JLD-ISG-12-01, for compliance with Order EA-12-049, Mitigation Strategies for Beyond-Design-Basis External Events.

The meeting started with the NRC making a presentation (Agencywide Documents Access and Management System (ADAMS) Accession No. ML12219A005), describing the NEI guidance document 12-06, "Diverse and Flexible Coping Strategies (FLEX) Implementation Guide, Revision C," which was submitted on July 3, 2012 (ADAMS Accession No. ML121910390), which was developed with the purpose of outlining a process to be used by licensees to define and implement site-specific mitigation strategies. JLD-ISG-012-01 is being developed to endorse with possible exceptions, NEI-12-06, and the remaining exceptions were next discussed at the meeting. NEI stated that they would be incorporating a majority of these remaining exceptions into another revision of NEI 12-06 and be submitting this to the NRC in the near future.

The meeting concluded with questions from the public and stakeholders.
