In the Matter of
CROW BUTTE RESOURCES, INC.
(License Renewal for the In Situ Leach Facility, Crawford, Nebraska)
Docket No. 40-8943; ASLBP No. 08-867-02-OLA-BD01

Dear Administrative Judges:

In its Order dated January 8, 2009, the Atomic Safety and Licensing Board ("Board") directed the NRC staff ("Staff"), commencing on January 15, 2009, to tender each month "a short report advising as to whether the estimated dates for issuance of the final [Safety Evaluation Report ('SER')] (predicted for summer/fall of 2009) and final [environmental review document] (predicted for December of 2009) have changed or become more definitive." The Staff is still currently waiting for a response from the Applicant regarding a proposed license condition. As such, the Staff now expects to issue the SER by the end of September 2012. As the Staff relies upon portions of the safety review documented in the SER to supply, in part, the contents of the environmental review document, the Staff now expects to be able to issue the final environmental document by December 2012. The Staff would also note that there is a possibility of delay (up to a few months) due to time potentially needed to accomplish activities pursuant to Section 106 of the National Historic Preservation Act.

In keeping with the Board's mandate, the Staff will tender its next monthly status report by September 14, 2012.

Respectfully submitted,

Executed in Accord with 10 CFR 2.304(d)

Brett Michael Patrick Klukan
Counsel for the NRC Staff
U.S. Nuclear Regulatory Commission
