Subject: SIA Report for the ASME N-702 Code Case Relief Request (TAC No. ME8087)

Peter,

Here is the revised SIA report in response to the discussion during the July 31, 2012, conference call with the NRC. Based on that discussion the SIA report has been revised as indicated by the revision bars therein and supersedes the previous revision. We believe this addresses the staff's concerns with the prior revision.

This report applies to RR-16 for the 4th interval.

This report applies to RR-002 for the 5th interval.

<< File: 1101463-301-Rev 2.pdf >>

I will be on vacation next week and Randy Rippy is also on vacation. If there are any questions please contact Pete Kissinger.
