**Subject:** Point Beach Nuclear Plant, Units 1 & 2 - Acceptance Review re: License Amendment Request - Operations Manager Qualification Requirements (TAC Nos. ME9270 and ME9271)

Dear Mr. Costedio:

By letter dated August 16, 2012 (Agencywide Documents Access and Management System (ADAMS) Accession No. ML12229A581), NextEra Energy Point Beach, LLC, submitted a license amendment request (LAR) for the Point Beach Nuclear Plant, Units 1 and 2. The LAR proposes a revision to Technical Specification 5.3, "Facility Staff Qualifications," to clarify the required qualifications of the Point Beach Operations Manager.

The purpose of this e-mail is to provide the final results of the U.S. Nuclear Regulatory Commission (NRC) staff's acceptance review of this request. The acceptance review was performed to determine if there is sufficient technical information in scope and depth to allow the NRC staff to complete its detailed technical review and make an independent assessment regarding the acceptability of the proposed change. The acceptance review is also intended to identify whether the application has any readily apparent information insufficiencies in its characterization of the regulatory requirements or the licensing basis of the plant.

The NRC staff has reviewed your application and concluded that there appears to be sufficient technical information, both in scope and depth, to enable the staff to proceed with its detailed technical review and make an independent assessment regarding the acceptability of the LAR in terms of regulatory requirements and the protection of public health and safety and the environment.

If additional information is needed for the staff to complete its technical review, you will be advised by separate correspondence.

Should you have any questions regarding this review, please contact me at (301) 415-3049.

Sincerely,

*Terry A. Beltz, Senior Project Manager  
Plant Licensing Branch III-1  
Division of Operating Reactor Licensing  
Office of Nuclear Reactor Regulation
