Mr. Tavassoli,

You have previously communicated with me information about thru hole penetrations in your NUHOMS storage system designs (Docket Nos. 72-1004 and 72-1029) as well as the sites at which these systems are utilized. These discussions were a result of aging management issues at the Three Mile Island Unit 2 independent spent fuel storage installation which were identified by Region IV inspectors and documented in an Inspection Report (ML11097A0281).

The attached Inspection Report (ML12228A457) documents the actions taken by the licensee to address and monitor the aging management issues. This report is being provided to you for your information only. If you have any questions, do not hesitate to contact me.

Chris Allen
