Subject: Lost Creek Production Rate
Date: Thursday, November 29, 2012 6:25:09 PM

Dear Tanya,

With this email I wish to reiterate our desire for NRC to consider our request to produce two million pounds of yellowcake per year from the Lost Creek Plant; consistent with Chapter 1.6 of the TR and as reviewed and commented on by the public. The average production rate would be approximately 1,000,000 pounds per year, however, the plant is designed to produce up to 2,000,000 pounds per year. There is no associated change in footprint, facility design, flow rate, surety, or process for this request.

If you have any questions please don't hesitate to call.

Regards

John Cash
