Re: Amendment to License #06-30080-01 for removal of the Cheshire, CT site.

030-33309

REC'D 1 DEC 14 12 PM 07/21

Dear Sir or Miss:

This letter serves to request a license amendment for the Connecticut Heart Group, P.C. We have stopped the radioactive material delivery and patient imaging at 1157 Highland Avenue, Unit 102, Cheshire, CT 06410. We may continue to operate in the office space but we no longer need to use it for nuclear cardiac imaging.

June 21, 2012 was the last day of radioactive material delivery for patient imaging at this office. Lend of day radiation level surveys and wipe tests for radioactive contamination were conducted and found satisfactory. Our consulting physicist-RSO also performed surveys and an assessment of the suspended service at the site. That data is included on the following page. The Cheshire reverence sources (for dose calibrator QA and camera flood source QA) were removed to the Branford office once we determined to proceed with this action.

If you should have any questions or require additional information regarding our nuclear cardiology imaging office please contact me or Patricia Arnold, Practice Administrator, at (203)315-5300.

We appreciate your efforts to process this amendment and we look forward to a continued safe and effective materials program. Thank you

Respectfully submitted,

Ajoy Kapoor, MD  
Vice President

## CONNECTICUT HEART GROUP, PC

46 Prince Street, 3rd floor, New Haven, CT 06519

The following data summarizes the final survey for ambient radiation (mR/hr) levels and removable contamination (dpm) from selected areas of the closed office. There were no areas demonstrating contamination and the final survey results were:

<u>Location</u>	<u>mR/hr</u>	<u>dpm</u>
Imaging Room		
patient table	≤ 0.03	307
gamma camera	≤ 0.03	307
work station	≤ 0.03	307
wipe test equipment	≤ 0.03	307
computer desk	≤ 0.03	307
Hot Lab		
counter	≤ 0.03	274
floor	≤ 0.03	274
Co flood case	1.0	302
Co, Cs sources on contact	2.0	302
Wastes		
general trash	≤ 0.03	274
"hot" boxes	≤ 0.03	274
Floor space, various	≤ 0.03	307
Reception desk & counter	≤ 0.03	307

The background radiation levels were: 0.03 - 0.04 mR/hr (ambient survey), 289 ± 34 dpm (contamination wipe). The survey instruments used were: Ludlum Model 14C GM Survey Meter, and a Ludlum Model 2200 Scaler/Ratemeter and Shielded NaI crystal with a well.

This is to acknowledge the receipt of your letter/application dated

12/04/2012, and to inform you that the initial processing which includes an administrative review has been performed.

☒ Amendment 06-30080-01  
There were no administrative omissions. Your application was assigned to a technical reviewer. Please note that the technical review may identify additional omissions or require additional information.

☐ Please provide to this office within 30 days of your receipt of this card

A copy of your action has been forwarded to our License Fee & Accounts Receivable Branch, who will contact you separately if there is a fee issue involved.

Your action has been assigned **Mail Control Number** 579637.  
When calling to inquire about this action, please refer to this control number.  
You may call us on (610) 337-5398, or 337-5260.
