PURPOSE: The purpose of the (teleconference) meeting between FirstEnergy Nuclear Operating Company (FENOC) and the U.S. Nuclear Regulatory Commission (NRC), Office of Nuclear Reactor Regulation (NRR), is to discuss a request for additional information (RAI) sent by the NRC staff to FENOC by letter dated December 28, 2012 (Agencywide Documents Access and Management System Accession No. ML12340A256). The RAI relates to a proposed license amendment request submitted by FENOC (ADAMS Accession No. ML12208A309), to the Beaver Valley Power Station, Units 1 and 2, Technical Specifications (TSs). The proposed amendment would modify TS 3.1.3 to allow the normally required near-end-of-life Moderator Temperature Coefficient measurement to be replaced by a calculated value under certain conditions.
