Laurie,

We will be not be providing non-routine services for US Govt owned equipment. If any abnormal or non routine conditions exist, we will always defer to the System Manufacturer for support.

Thank you,

Randy

Mr. Kaminsky:

When you get a chance please contact me before Thursday? I also left a voice-mail regarding this matter.

Essentially, I need to know if you intend to perform non-routine maintenance on the devices and/or sources.

If you intend to perform non-routine maintenance, you must provide the information described in NUREG 1556, Vol. 18, Appendix P, for review. This also includes dosimetry, etc.

Thank you, in advance, for your prompt reply.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.
