Dear Secretary,

I wish to become a co-petitioner on the Petition for Rulemaking submitted February 15, 2012 by Nuclear Information and Resource Service and 37 other organizations.

This petition would make substantial and necessary improvements in the NRC's emergency planning regulations. It should be self evident that if an evacuation zone is necessary, that there is something very dangerous involved, and should not be near areas of public habitation. It should not exist, especially after what we saw in Japan last year, in Russia two decades ago, and the potential of disaster at Three Mile Island in the 1970's. How many disasters or near disasters does it take for people to learn this lesson?

Please inform me when this petition is docketed for public comment.

Thank you.
