Steve,

We have reviewed the CPNPP COL Chapter 16 safety evaluation. We found no material that should be withheld from the public and no factual errors. We did identify two editorial items for your information:

On page 16-8 there seems to be two extra carriage returns that are not needed.

On page 16-16 in the first paragraph below the bullets, on the third line, the text reads "reactors to for the new generation ...." It appears that the word "to" should not be there.

Neither of these items impact the meaning of the SE. If you have any questions, feel free to contact me.
