Subject: Brunswick Steam Electric Plant, Unit Nos. 1 and 2  
Docket Nos. 50-325, 50-324  
Independent Spent Fuel Storage Installation (ISFSI) Docket No. 72-006  
Registration and Use of Cask to Store Spent Fuel

In accordance with 10 CFR 72.212(b)(2), Carolina Power & Light Company (CP&L) is registering use of two approved spent fuel storage casks at the Brunswick Steam Electric Plant (BSEP) ISFSI. Registration of these casks is required no later than 30 days after using the casks to store spent fuel. The required cask registration information is enclosed.

The General Requirements and Conditions of the Technical Specifications for Amendment No. 10 to Certificate of Compliance No. 1004, Section 1.1.7, "Special Requirements for First System in Place," also requires a 30-day notification of the results of a thermal performance assessment for the first cask system in place. This information is required for the dry storage canister (DSC) with the highest heat load. The highest heat load to date was DSC BNP-61BTH-2-F-1-HZ08, which was reported by CP&L's letter dated February 24, 2011 (i.e., ADAMS Accession Number ML110670429); therefore, a thermal performance assessment is not being provided for the casks being registered by this letter.

This document contains no regulatory commitments.

Please refer any questions regarding this submittal to Mr. Lee Grzeck, Manager – Regulatory Affairs, at (910) 457-2487.

Sincerely,

Annette H. Pope  
Manager – Organizational Effectiveness  
Brunswick Steam Electric Plant
