Subject: Support Emergency Planning Petition

Please include me as a co-petitioner on the Petition for Rulemaking submitted February 15, 2012 by Public Citizen, Nuclear Information and Resource Service and 36 other organizations.

This petition would make substantial and necessary improvements in the Nuclear Regulatory Commission's emergency planning regulations. The accidents at Three-Mile Island and Fukushima are clear indications that we have not mastered the safe implementation of nuclear power, and by extending its domain we may be creating our own Armageddon. If we insist on using nuclear reactors, we MUST improve the means of protecting our citizenry from their ill effects.

Please inform me when this petition is docketed for public comment. Thank you.

Sincerely,

Mary E. Ford
