Subject: Demand the installation of filtered vents on Mark I and II nuclear power plants

Follow Up Flag: Follow up
Flag Status: Completed

Dear Secretary Annette Viette-Cook:

I am writing to the Nuclear Regulatory Commission to urge that the members vote Yes to the upcoming proposal to install filtered vents for radiation on all US Mark I and II nuclear power plants in response to the Fukushima accident which occurred with Mark I reactors. This is one of the minimal steps the industry can take to protect the public from these badly designed older plants, and I would hope that your commissioners would do their job to protect the public rather than supporting the nuclear power companies' concerns to save money. Please use your regulatory powers for the common good and follow the advice of your own experts to require this safety installation. I live only 30 miles from Vermont Yankee, a Mark I reactor, and I am concerned for my own health and those of my children and grandchildren.

Please advise me what your decision is on this matter.

Sincerely
Ann Ferguson
