Subject: NRC Proposed Filter Rule Affecting the Xcel Energy Monticello Reactor

Follow Up Flag: Follow up
Flag Status: Completed

Dear Commissioners:

Since Xcel Energy could afford the \$16 million it paid in 2011 for its CEO position, it can certainly afford to make a one-time investment of \$20 million for a radiation filter at its Monticello reactor to protect the health of its customers and the millions of people who reside in Minnesota. Given that Xcel Energy has about 3.3 million customers, we may see a one-time charge of \$7 on our electric bills, but that is a lot cheaper than chemo-therapy and other healthcare and social costs associated with increased cancer rates.

Martha Morse
