Subject: Strengthen or Close GE Reactors

I understand that the NRC Commissioners soon will vote on whether or not to require filters and rupture discs on vents used to relieve pressure from containments in a severe accident in reactors designed and manufactured by General Electric.

I understand that the nuclear industry mouthpieces are opposing these minor safety additions.

Let me put it bluntly: FUCK THE NUCLEAR INDUSTRY PIGS! THEY HAVE BEEN IRRESPONSIBLE, GREEDY, MEGALOMANIACS SINCE DAY ONE. The NRC has heretofore miserably failed to effectively regulate them in the public interest -- you have a lot of catching up to do. If the industry has the audacity to oppose such minor and questionably sufficient safety ideas, SHUT THEM DOWN COMPLETELY for lack of trust to be responsible citizens.

Jim Wells
