## LICENSEE:

The inspection was an examination of the activities conducted under your license as they relate to radiation safety and to compliance with the Nuclear Regulatory Commission (NRC) rules and regulations and the conditions of your license. The inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector. The inspection findings are as follows:

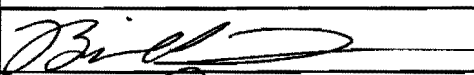

- ☒ 1. Based on the inspection findings, no violations were identified.
- ☒ 2. Previous violation(s) closed.
- ☐ 3. The violation(s), specifically described to you by the inspector as non-cited violations, are not being cited because they were self-identified, non-repetitive, and corrective action was or is being taken, and the remaining criteria in the NRC Enforcement Policy, to exercise discretion, were satisfied.

Non-cited violation(s) were discussed involving the following requirement(s):

- ☐ 4. During this inspection, certain of your activities, as described below and/or attached, were in violation of NRC requirements and are being cited in accordance with NRC Enforcement Policy. This form is a NOTICE OF VIOLATION, which may be subject to posting in accordance with 10 CFR 19.11.  
(Violations and Corrective Actions)

## Statement of Corrective Actions

I hereby state that, within 30 days, the actions described by me to the Inspector will be taken to correct the violations identified. This statement of corrective actions is made in accordance with the requirements of 10 CFR 2.201 (corrective steps already taken, corrective steps which will be taken, date when full compliance will be achieved). I understand that no further written response to NRC will be required, unless specifically requested.

**PROGRAM SCOPE**

The licensee is a large sized steel manufacturing firm located in Dearborn, Michigan. The licensee possessed eight fixed gauges used for level determination in their steel making process. Licensee does not perform any service or maintenance activities on the gauges. The licensee currently employ an outside consultant to perform leak tests, installations, removal, and shutter checks of the fixed gauges.

**Performance Observations**

The inspector toured the facilities and reviewed the licensee's records associated with leak tests, shutter checks, inventories, training, annual audits, and gauge tag out procedures. The inspector also observed that all postings were legible. The inspector performed independent radiation measurements of the fixed gauges and did not identify any readings above regulatory compliance. The inspector also closed out the previous violation of failure of performing shutter checks every six months.

No violations of NRC regulatory requirements were identified.
