**Subject:** RE: Oconee CALs

Scott, both CALs are open and being tracked in RPS.

The first CAL is for the flooding issue. No closure date in sight. Modifications will take a while to plan and complete (years). We are/will be evaluating Fukushima requirements to see if at some point the CAL can be closed to them.

The second CAL was the outcome of the SSF pressurizer heaters yellow issue. I anticipate this will be closed out in early 2013 once they complete the SSF design and licensing basis reconstitution.

Jonathan, Eric, are the two attached CALs open or closed? If open, any idea when they will be closed?
