Subject: RE: Oconee response to NRC's CAL RAIs on flood wall design ~~OUO~~

John, any thoughts on we are going to get together to discuss the 2 questions? I think we need to be careful on question 1 in that the SE was only for a failure of the dam, not for Probable Maximum Precipitation on site.

Attached is the response from Duke on the flood wall design. They also added 2 questions they would like us to answer on how the flooding CAL and the Fukushima 50.54(f) letter will be coordinated. I will set up a conference call with us and Region I to discuss how to answer their questions.
