Subject: RE: Request Completion of NRC FORM 758 to establish TAC for NRC review & comment of DOE/WVDP Documented Safety Analysis for HLW Canister Interim Storage Facility at West Valley site

DOE provided information to familiarize NRC staff with existing DSA for the existing WVDP facility. DOE indicated that updated DSA will contain information on the proposed DOE/WVDP HLW Canister Interim Storage Facility (CISF) that is expected to be submitted for NRC review & comment in the March 2013 time frame. At this time, DWMEP seeks to establish a TAC for this anticipated NMSS/SFST review (e.g., SFST is NRC organization with special expertise for such reviews). Upon receipt of updated DSA, DWMEP plans to task NMSS/SFST to conduct an expedited review of DSA for the DOE/WVDP CISP.

DOE/WVDP has proposed a 30 day NRC review and comment period. NMSS/SFST estimates ~ 6 week period to complete their review and comment. Please open a TAC for this action.
