Washington, DC 20555-0001

Dear Chairwoman MacFarlane:

I am writing to express support for a fair and inclusive regulatory process currently underway for the proposed restart and operation of the San Onofre Nuclear Generating Station (SONGS) Unit 2. As a local elected official, I strongly believe that maintaining a public and transparent regulatory process is vital for the quick restart of the critical generation that SONGS provides to the area. On October 9, 2012, I had the opportunity to speak at the Nuclear Regulatory Commission (NRC) meeting which was held in San Clemente, California and expressed my opinion that I strongly believed that Southern California Edison should be allowed to restart and operate SONGS as proposed in their Return-to-Service Action Plan if the Nuclear Regulatory Commission (NRC) determines they have sufficiently completed the compensatory and corrective actions requested in the March 27, 2012 Confirmatory Action Letter.

California businesses and residents are facing a tough economy and with thousands of jobs and public services that depend on a reliable power system, SONGS serves a critical function of providing voltage support throughout the year. Developing alternative sources of energy to offset the loss of power generated at SONGS may be necessary, but I am concerned that no source will be able to be put into place quickly enough to provide for the immediate reliability that our businesses and residents need during peak conditions.

Finally, in light of our nation's economic downturn, along with the elimination of California Redevelopment Agencies this past year, our fragile recovery into strong economic growth requires affordable, reliable power to businesses and residents alike. Therefore, I encourage the NRC to continue moving forward with the existing process and look forward to a favorable safe restart of SONGS.

If you have any questions, please feel free to contact me.

Sincerely,

Walter Allen III, Mayor Pro Tem
City of Covina
