Subject: Pond Monitoring Condition

This is the final condition that will be included in the license.

No later than 60 days prior to construction, the licensee shall submit to the NRC for review and verification, a pond detection monitoring plan that contains the number, locations, and screen depths of groundwater monitoring wells to be installed around the Burdock area and Dewey area ponds. The plan shall also include sampling frequency and sampling parameters. Monitoring wells installed to comply with the licensee's Groundwater Discharge Permit issued by the State of South Dakota may be incorporated into this monitoring network.

Please let me know if you agree with this condition. Also, when you respond, if you don't hear back from me in 15 minutes after your responses, please call me so I can determine whether or not my email is working.

Regards,

Stephen J. Cohen
